

**A better life for rural communities  
through rehabilitation for all**

**Hi Student Colleagues,**

We believe that rural work can be inspiring and fun, and with a little support we can achieve great things! If you are going on a rural practice as a student or considering working rural for your community service then Rural Rehab South Africa (RuReSA) can offer you information and support. This is a newly formed interest group for rehabilitation professionals (viz. Physios, OTs, Speechies and Audios), who are working in rural areas, or supporting the development of rural rehabilitation professionals and service development.

Membership is free for students so get joining.

We subscribe to a Google Group by which we share information and news, and a Facebook page for logging upcoming events and requests for help.

Distance mentoring and clinical consultation are offered by passionate, seasoned die-hards who worked rural before the turn of the century! Our website has lots of useful information and links.

There's more! We co-host the annual Rural Conference (RuReSA/PACASA/RuDASA) that focuses on rural rehabilitation, public health, and rural health issues. It's always in exciting out-of-the-way places you'd otherwise never explore! Get cracking on the road less travelled!

To join RuReSA complete the membership form on [www.ruresa.com](http://www.ruresa.com) and email it to [ruralrehabsa@gmail.com](mailto:ruralrehabsa@gmail.com), or just email us for help. The Office Co-ordinator will put you on the mailing lists and let you know how to join the rural-rehab-google-group and listserve.
